# Bird Netting

Don't take chances when you can protect your precious grape crops.

Pridham Viticulture has both bird netting application and retrieval services for multi-row drape netting and lock out netting. Equipment available for this service is the Net-Master system and tractors as required. A site inspection will be required prior to providing a price estimate as there is an extensive check-list to complete before we can accurately provide pricing details for any individual vineyard.

We can discuss netting options and arrange for the purchase of netting for your vineyard as required.

If you decide on "Lock-out" netting custom designed to suit your vineyard(s) then surveying and manufacturing time is required. Lead times do apply.

**Remember – more fruit – better quality - larger bonus – more profit!**

Telephone now and we can arrange a site inspection and price estimate!
