## GIS Services

### GEOGRAPHIC INFORMATION SYSTEMS

Pridham Viticulture is a leader in the provision and application of IPV (Integrated Precision Viticulture) through the use of Geographic Information Systems (GIS). Our organisation is equipped with hand held GPS units, Viewpoint software and PDA's so your valuable vineyard data can be applied practically.

### Integrated Precision Viticulture - Practical Applications

Irrigation fine tuning & troubleshooting  
Differential harvesting  
Sectional cover cropping  
Differential fertiliser spreading  
Inter-row sub soil renovation  
Pruning  
Valuable negotiation tool for winery contracts

To discuss your requirements and a cost structure tailored to suit please call:
