Irrigation & Water

Pridham Viticulture can assist you in all facets of irrigation design, installation, maintenance and repairs - from small holdings and domestic systems to broad-acre vineyards.

We specialise in the design of effective system treatments and design ongoing maintenance schedules for your system to keep it on track.

In conjunction with our Soil Moisture Monitoring Service and utilising the latest in technology, we can provide you with efficient and accurate application of our most valuable resource – water.

Pridham Viticulture can provide a complete irrigation system auditing service to ensure that your system is running as per specifications and saving you time and money.
