# Soil Moisture Monitoring

Utilising a user friendly, web-based reporting format, Pridham Viticulture can provide you with an easy to interpret and indispensable tool for maximising returns from your valuable investment.

## System specifications

The Enviroscan Solo Continuous Logger, Diviner 2000 Probes and Enviroscan Plus Remote Loggers are Sentek products - an Adelaide based company with world wide distribution. The system uses Electronic Capacitance Technology to measure soil moisture content. These products and systems are widely used in agriculture, mining, railways and in many other industries and applications.

For further clarification on any aspect of this system or a schedule of costs please call:
