Vine reconstruction

Pridham Viticulture has extensive experience in the art of vine reconstruction. We use various methods developed over years that enable cropping to continue while the reconstruction process proceeds over a three year period. Alternatively if you require a tougher approach with immediate results restoration can be achieved in one pruning season. We use the latest innovations in low carbon emission electric tool technology that are safe to operate, have low noise output and hasten the job.

Call us and let us know what you want done and we will give you advice on what is the most favourable outcome based on our experience.

Schedule of fees

Call us and see what we can do for you.

We can also offer

Trellis upgrades
Vine training
Irrigation renewal
